activated: Si

## Sources

A suggest source is a URL that takes 3 parameters: query, input and nb. The query parameter must contain a `__INPUT__` placeholder. This URL must process the query with the given user input and return the result in the XML format expected by the suggest component.

Name	URL	Query	Results Number	Icon	Highlight matches	Activated
\$services.localization.locale.coding.url(XWikiSearchSuggestSourceProvider)	\$xwiki.getSkinFile('skins/silk/outputSyntax=plain')	name:INPUT* OR web:INPUT*		\$xwiki.getSkinFile('skins/silk/page_white_text.png')	Si	Si
\$services.localization.locale.coding.url(XWikiSearchSuggestSourceProvider)	\$xwiki.getSkinFile('skins/silk/outputSyntax=plain')	INPUT*		\$xwiki.getSkinFile('skins/silk/page_white_text.png')	Si	Si
\$services.localization.locale.coding.url(XWikiSearchSuggestSourceProvider)	\$xwiki.getSkinFile('skins/silk/outputSyntax=plain')	filename:INPUT* AND type:attachment		\$xwiki.getSkinFile('skins/silk/attach.png')	Si	Si
\$services.localization.locale.coding.url(XWikiSearchSuggestSourceProvider)	\$xwiki.getSkinFile('skins/silk/outputSyntax=plain')	ft:INPUT* AND type:attachment		\$xwiki.getSkinFile('skins/silk/attach.png')	Si	Si
\$services.localization.locale.coding.url(XWikiSearchSuggestSourceProvider)	\$xwiki.getSkinFile('skins/silk/outputSyntax=plain')	INPUT* AND object:Blog.BlogPostClass		\$xwiki.getSkinFile('skins/silk/page_white_picture.png')	No	No
